ROOF SOLUTIONS+ WE MAKE YOUR ROOF LOOK AND FEEL GOOD

Why the sudden explosion of roof staining? Modern shingle formulas include a variety of cellulose and limestone fillers which algae, fungus and moss find very nutritious. The appearance of black or green stains is the first sign that damage may be occurring. If this biological growth has infected your roof, it should not be ignored.

Prevent this type of destruction, and prolong the life of your roof. We use "Earth Friendly Formula" that is safe for people, pets and plants. Once used, it breaks down into harmless minerals that do not pollute our environment like poison chemicals do. Our formula protects by safely killing the algae, moss and fungus that are feeding on your roof material. It works great on any type of shingle, wood shake, barrel tile, concrete tile, and clay tile. From Florida to California, we are protecting homes all over America!

Important Consumer Notice: Roof Reviver(TM) has met strict standards, and proudly proves it. Our formula has been tested and proven with the Environmental Protection Agency and top shingle manufacturers. Don't be fooled! Many roof cleaning products sold on the internet today are dangerous chemicals that can damage your roof. Simply put, *"If a roof cleaning product hasn't been registered with the EPA and tested by the top shingle manufacturers, then don't use it."* We think you'll agree!

PS make a visual inspection of the gutters. Where ugly streaks or stains are present, excessive lost granules accumulate in the bottom of the gutter. In some cases, the entire bottom of the gutter is covered! Now, inspect the gutters where no roof stains are apparent. There are very few granules to be found here. Seeing is believing. Why? Protective granules are being lost as roof stains get worse. Permanent damage can result to any roof in less than 7 years! Most importantly, shingle manufacturers consider this destructive problem a condition of the environment, and not a defect of the shingle. Therefore, the warranty does not cover this type of damage. The homeowner is on their own. Unless you just enjoy buying a new roof on occasion, have us treat it!
